1 QUESTION NO-2.2

Construct an isosceles triangle whose base is $a = 8\text{cm}$ and altitude $AD = h = 4\text{cm}$.

2 SOLUTION

Given,

$$a = 8, h = 4 \quad (2.0.1)$$

we use the Pythagoras theorem,

$$c^2 = a^2 + b^2 \quad (2.0.2)$$

$$\Rightarrow c^2 = 4^2 + 4^2 \quad (2.0.3)$$

$$\Rightarrow c^2 = 32 \quad (2.0.4)$$

$$\Rightarrow c = 5.6 \quad (2.0.5)$$

$$\mathbf{b} = \mathbf{c} \quad (2.0.6)$$

Two sides are equal so $\triangle ABC$ is isosceles triangle
Let the vertices of $\triangle ABC$ and \mathbf{D} be

$$\mathbf{A} = \begin{pmatrix} p \\ q \end{pmatrix}, \mathbf{B} = \begin{pmatrix} 0 \\ 0 \end{pmatrix}, \mathbf{C} = \begin{pmatrix} a \\ 0 \end{pmatrix}, \mathbf{D} = \begin{pmatrix} p \\ 0 \end{pmatrix} \quad (2.0.7)$$

Then

$$AB = \|\mathbf{A} - \mathbf{B}\|^2 = \|\mathbf{A}\|^2 = c^2 \quad \because \mathbf{B} = \mathbf{0} \quad (2.0.8)$$

$$BC = \|\mathbf{C} - \mathbf{B}\|^2 = \|\mathbf{C}\|^2 = a^2 \quad (2.0.9)$$

$$AC = \|\mathbf{A} - \mathbf{C}\|^2 = b^2 \quad (2.0.10)$$

From (2.0.10),

$$b^2 = \|\mathbf{A} - \mathbf{C}\|^2 = \|\mathbf{A} - \mathbf{C}\|^T \|\mathbf{A} - \mathbf{C}\| \quad (2.0.11)$$

$$= \mathbf{A}^T \mathbf{A} + \mathbf{C}^T \mathbf{C} - \mathbf{A}^T \mathbf{C} - \mathbf{C}^T \mathbf{A} \quad (2.0.12)$$

$$= \|\mathbf{A}\|^2 + \|\mathbf{C}\|^2 - 2\mathbf{A}^T \mathbf{C} \quad (\because \mathbf{A}^T \mathbf{C} = \mathbf{C}^T \mathbf{A}) \quad (2.0.13)$$

$$= a^2 + c^2 - 2ap \quad (2.0.14)$$

yielding

$$p = \frac{a^2 + c^2 - b^2}{2a} \quad (2.0.15)$$

$$p = \frac{8^2 + (5.6)^2 - (5.6)^2}{16} \quad (2.0.16)$$

$$p = 4 \quad (2.0.17)$$

From (2.0.8),

$$\|\mathbf{A}\|^2 = c^2 = p^2 + q^2 \quad (2.0.18)$$

$$\Rightarrow q = \pm \sqrt{c^2 - p^2} \quad (2.0.19)$$

$$\Rightarrow q = \pm \sqrt{(5.6)^2 - 4^2} \quad (2.0.20)$$

$$\Rightarrow q = \pm 3.9 \quad (2.0.21)$$

Let the vertices of $\triangle ABC$ and \mathbf{D} be

$$\mathbf{A} = \begin{pmatrix} 4 \\ 3.9 \end{pmatrix}, \mathbf{B} = \begin{pmatrix} 0 \\ 0 \end{pmatrix}, \mathbf{C} = \begin{pmatrix} 8 \\ 0 \end{pmatrix}, \mathbf{D} = \begin{pmatrix} 4 \\ 0 \end{pmatrix} \quad (2.0.22)$$
